WHO WE ARE

PKM Metal Buildings Company Pvt Ltd was incorporated in the year 2005 to cater to the ever increasing demand from the client base created by its Parent Company, P. K. Mohammed & Co., for the manufacture and supply of quality Pre-Engineered Metal Building (PEB) Systems. P. K. Mohammed & Co. was the brainchild of an entrepreneur visionary, Mr. P. K. Mohammed to meet the Steel Industry requirement.

PKM Metal Buildings Company Pvt Ltd has about 300 employees with over 30 percent being in the pay slip and other on contractual basis to meet commitment to scheduled, faultless execution of projects - these form the essence of a high degree of professionalism that goes with every structural engineering company. Beyond this it would be sheer grit and sweat to make any effort absolutely successful and worth its while. Such qualities deeply ingrained within the core of its operations, **PKM Metal Buildings Company Pvt Ltd**, have stood the test of time and competition for about 4 decades.

PKM Metal Buildings Company Pvt Ltd, headed by Abdul Basheer supplies Steel Structures involved in industrial building such as quality Pre-Engineered Metal Building (PEB) System, Steel Structures, Process Towers & Feed Mills, Conveyors, Hoppers, Silos, Chimneys and any kind of conventional Steel Structure used in infrastructure.

OUR VISION

To set the benchmark for our nations' construction industry by implementing superior innovative technology, competent engineering and excellent customer service; thus leading the company to enhance its presence in the realm of Pre-Engineered Metal Building (PEB) Systems and general steel structures.

OUR MISSION

To provide high-quality and cost effective solutions and offer efficient execution of projects, with a clear focus on achieving client satisfaction and on time delivery.

QUALITY POLICY

PKM Metal Buildings Company Pvt Ltd is committed to achieve the highest level of customer satisfaction by providing top of the line designs and excellent, on time, affordable fabrication & erection of pre-engineered steel buildings.

PKM Metal Buildings Company Pvt Ltd is focused on offering reliable and innovative solutions to a worldwide clientele through the continual improvement in the quality management system by total employee involvement.

INFRASTRUCTURE

PKM Metal Buildings Company Pvt Ltd has over 6 acres of sprawling factory premises located at Kancheepuram, off Chennai - Bangalore National Highway with over 70,000 Sq Ft of covered area. The plant is well equipped with all major fabrication PEB machineries like Auto Beam welding line, CNC cutting and sheering, Auto assembler, bend removing, Roofing panel former, quick change C-Z purlin former and all machineries for miscellaneous building components, that enables the company to meet the most sophisticated requirements of Steel Fabrication work.

The total in-house machineries and equipments for erection and installation of structures gives PKM Metal Buildings Company Pvt Ltd the ability to execute any project within the required budget and time frame with uncompromising quality. And this has been proven time and again by the efficient execution of various complex projects for large Corporate and Multi National Companies.

WHY PKM METAL BUILDINGS COMPANY?

- › Up-to-date Technical Knowhow
- › State-of-the-art Infrastructural Facilities
- › Advanced Production Capability
- › Quality Raw Materials Assured
- › International Standardization
- › Dedicated Design Team
- › Multistoreyed Buildings Execution
- › Flawless Customer Care
- › Technical and Engineering Support
- › Nation-wide Projects Execution
- › Numerous Satisfied Multinational Clients

OUR ACHIEVEMENTS

Over 2,00,000 (two lakhs) Sq. Ft. of Single Building
Over 52 Meters of Clear Span Building
Over 55 Meters of Multi-Storeyed Steel Building

PRE-ENGINEERED BUILDINGS (PEB) CONCEPT

The PEB concept is designed to provide a complete building system, that is air tight, economical, eco-friendly and customized. It adheres to the established international norms to ensure safety, quality and perfection. The basic steel frame work is fabricated by blending built-up sections, hot rolled and cold formed steel material to form a technically stable and aesthetically appealing metal building concept. Adding to the structural qualities, the inclusions of optional sub systems like mezzanine floors, canopies, extensions, and crane systems increases the utility of the metal buildings. Large span and high rise buildings are easily executed.

BENEFITS

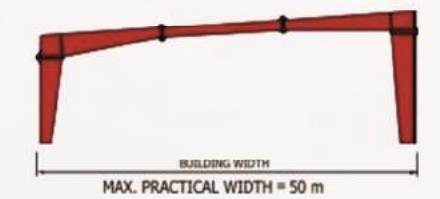

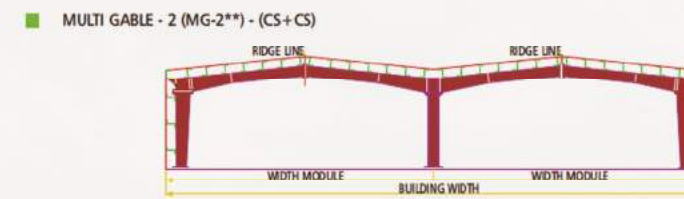

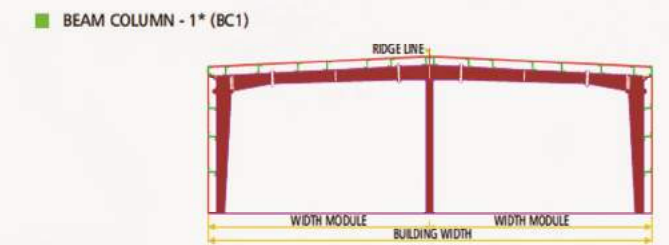

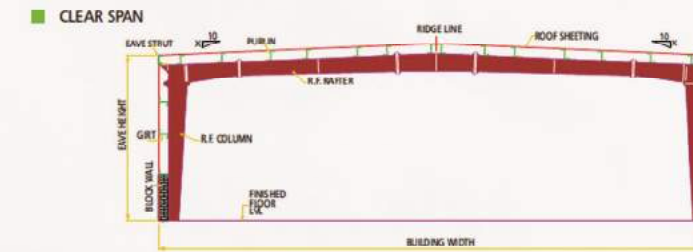

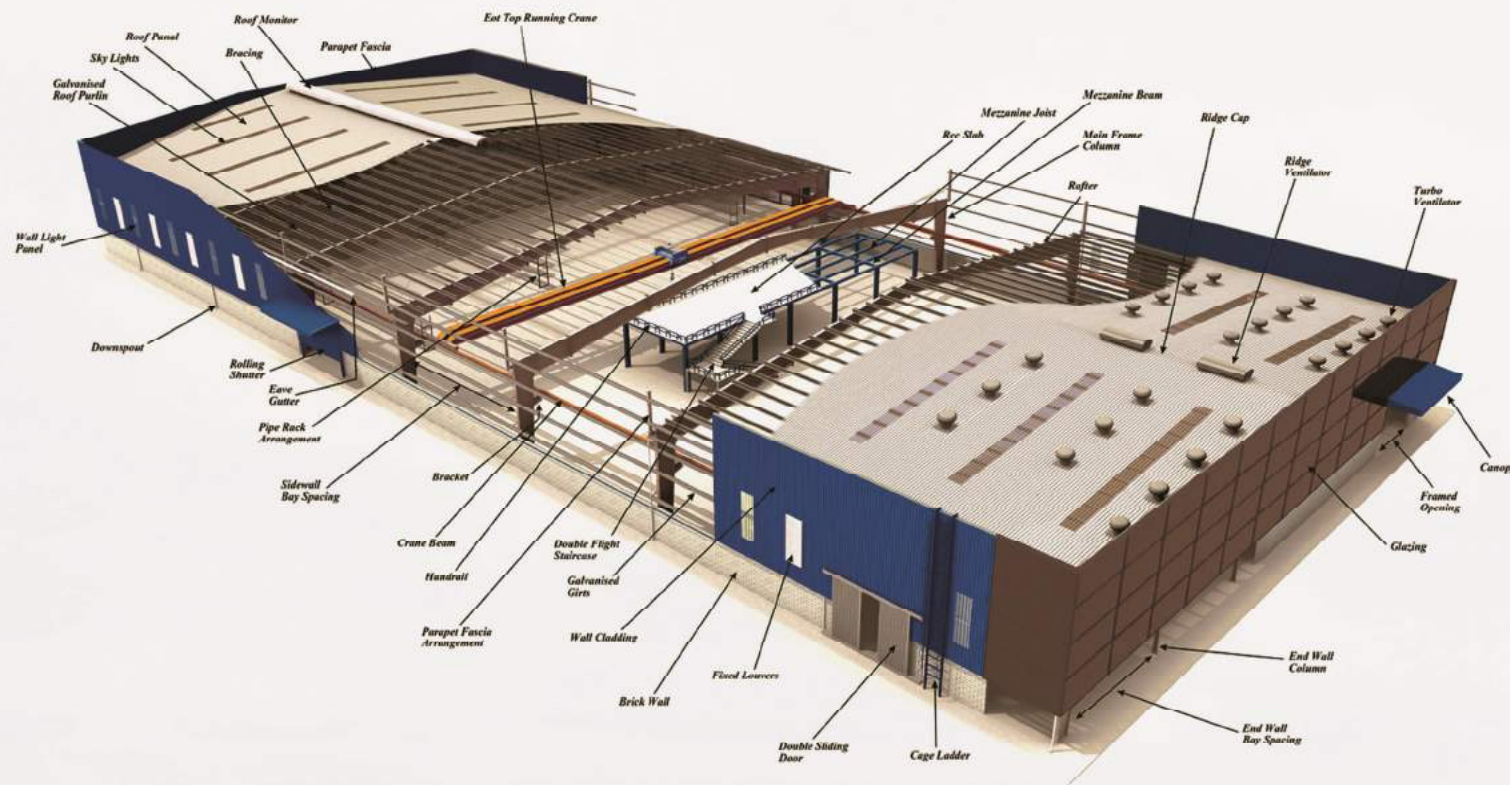

- › Design Optimization
- › Great Volumetric Space can be achieved with effortless Future Expansions
- › Fire Resistant and Maximum Resistance to Heavy Wind Loads and Seismic Disturbances
- › Design, Manufacturing and Erection are smoothly executed with Quick Delivery
- › Architectural Supremacy
- › Energy Efficient and Low Maintenance Cost
- › Best suited for Modern Application Compatibility

APPLICATIONS

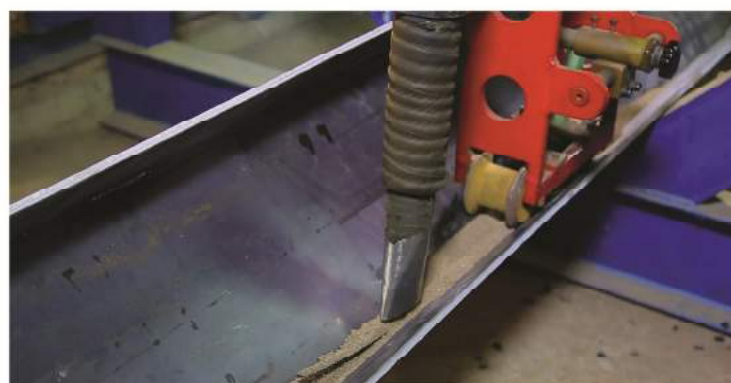

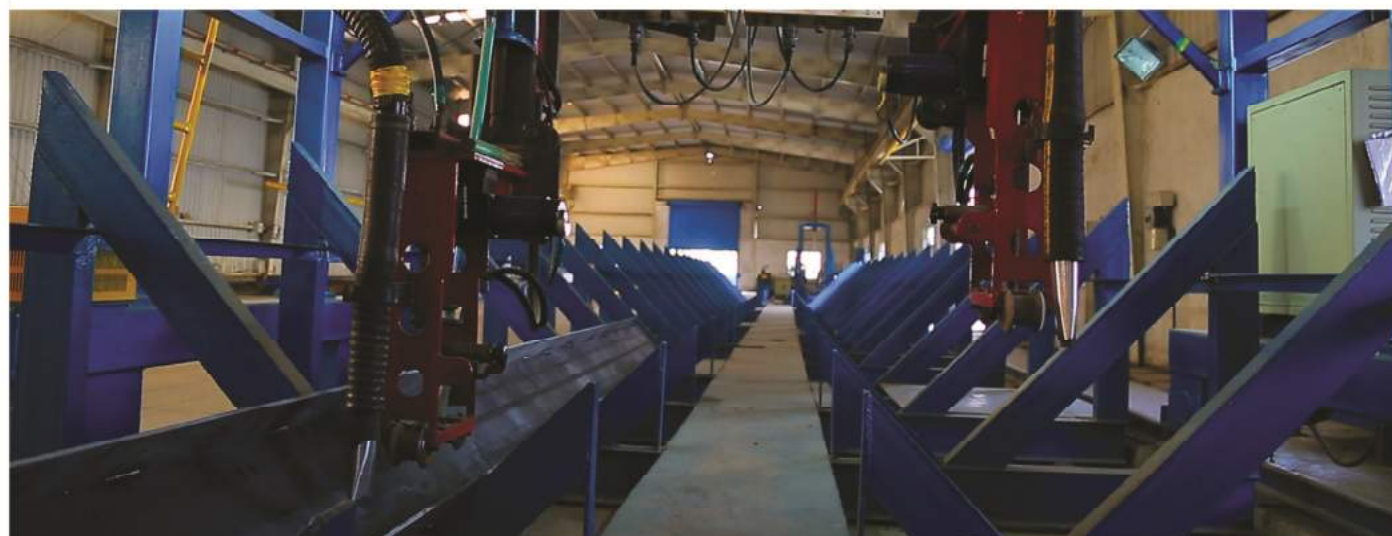

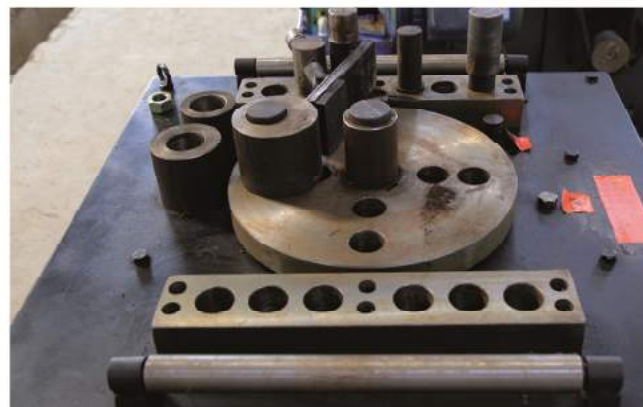

- › Industrial Buildings
- › Factories
- › Warehouses
- › Power Generation
- › Railway Stations
- › Workshops
- › Aircraft Hangars
- › Marriage Halls
- › Sports Centers
- › Super Markets
- › Gas Stations
- › Schools & Colleges
- › Distribution Centers
- › Convention Halls
- › Commercial Show Rooms
- › Restaurants and Resorts
- › Poultry Farm
- › Tiny Sector Sheds
- › Security Cabins
